

Skylar Table Lamp

1:Connect the base to the lamp with a lamp post, thread the main line into the base and connect it to the switch wire wiring

Press the switch wire tightly onto the velvet pad with the pressure plate

2:Lock the copper ring and acrylic sheet onto the lamp with cylindrical Midea

3:Install a light source to test the brightness

4:Lock the glass sheet onto the copper ring with a round bead, and alternately press AB as shown in the figure to install the long glass A in the bottom layer, short glass B in the surface layer
