after
installation

Step (2)

Step (1)

Step 1: First, tighten the (a) marble plate and the (b) 4-millimeter inner tooth cylindrical column together, and then install the (c) copper arc plate lamp body. Use two 4-millimeter external thread screws to lock the two (b) 4-millimeter internal thread small cylinders together towards those two holes (Note: Do not lock them too tightly).

Step 2: After confirming the power is disconnected, install the lamp body on the fixed hanging board as shown in the figure.
