

1 Install the tripod

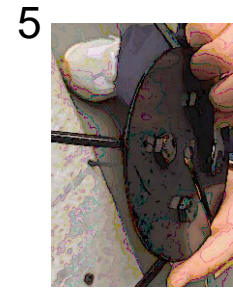

2 Fix the tripod into the 4 holes of the disc

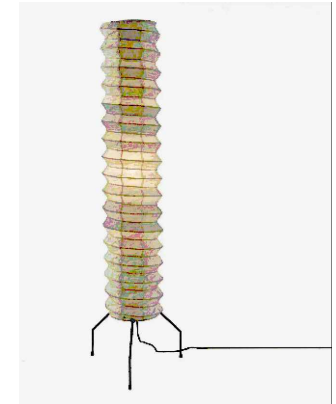

3 Adjust the tripod position so that the four legs form a vertical cross shape.

4 After adjustment, flip it upside down.

5 Tighten the fixing screw with a small wrench

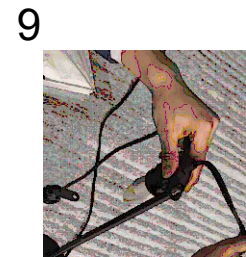

6 Take out the light pole with the letter A on it

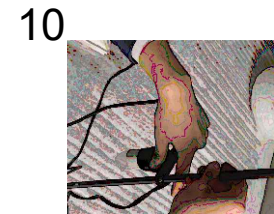

7 Unscrew the nut

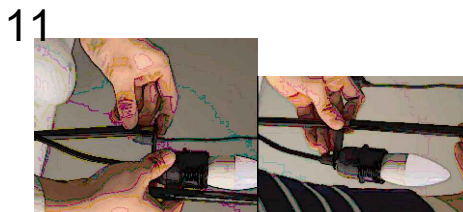

8 Insert into the hole in the middle of the disc

9 The lamp head at the lower end is inserted into the upper end of the letter A rod

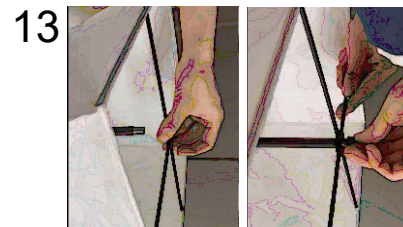

10 The rod with letter B is screwed on and fixed

11 The other lamp head is inserted into the upper end of the B rod and fixed with the C rod.

12 After installing the bracket, clean your hands and make sure they are clean

13 Slowly put the lampshade into place  
Insert and screw on the cap to fix

14 Fix the bottom of the lampshade with a rope. Be careful not to tie the first rope too tight. Fix it lightly.
